TWS Certification, Recertification and Professional Development: TWS Western Section, February 2018, "Wildlife Biologist Construction Awareness Training." This workshop contained 3.5 hours of content, or 0.25 equivalent semester hours - it may not be worthwhile to request actual academic equivalence credit for this training, however you can/should list it in section J -Communication, in the box where the application says "PLEASE FULLY DOCUMENT ANY PROFESSIONAL EXPERIENCE OR NON-TRADITIONAL EDUCATION TO BE SUBSTITUTED FOR EDUCATIONAL DEFICIENCIES." If you need 0.25 units to "put you over the top," go ahead and list it under one of the numbered lines in section J, above. In your course description, be sure to mention that this was TWS Western Section-sponsored training.

For CWB recertification or in support of obtaining a Professional Development Certificate, request 4 hours in Category A. Additional Questions? Contact your TWS Western Section Professional Development Committee.
